

# Transforming EMV Certification & Compliance in the Cloud

 **ASTREX**Enterprise Cloud Certification

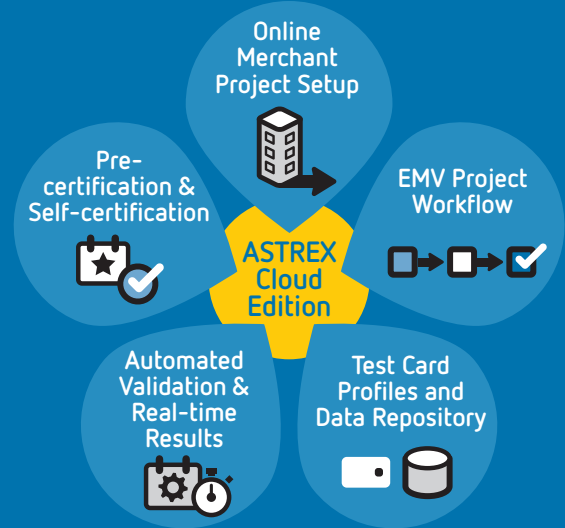

## The challenge of EMV certification

EMV scheme certification for merchants, VARs and acquirers can be long and resource intensive. After the initial EMV certification compliance testing is required every time a local system or the standard itself is updated. Each certification must be scheduled and managed by the Acquirer, with pre-booked slots for host system access. The volume of certifications required means this is expensive and inefficient.

## Transforming Payments Certification: EMV in the Cloud

ASTREX Cloud Certification is a transformational new solution to the challenges faced by the payments industry in achieving EMV certification and maintaining compliance.

With ASTREX Cloud Certification, Acquirers can now offer merchants and VARs a self-driven cloud based solution to pre-validate and self-certify for EMV.

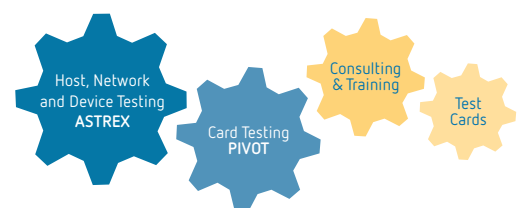

Our solution puts merchants in control and guides them through the EMV project process, giving them real-time responses from a fully-featured host test simulation environment. ASTREX Cloud Certification reduces the cost, time and effort of Certification for both Acquirers and their Merchants.

### ASTREX Cloud Certification - Benefits at a glance

<b>1</b>	<b>Rapid and Scalable EMV certification for merchants and VARs.</b> With ASTREX Cloud Certification you can now deliver a scalable certification solution to rapidly migrate your merchant base and at a lower cost to your business.
<b>2</b>	<b>Make self-certification a reality. ASTREX Cloud Certification offers self-certification to merchants and VARs.</b> This self-driven platform empowers merchants to drive their certification project at their pace. It offers full access to test hosts, freeing up certification queues and reducing both the pull and dependency on the Acquirer's resources
<b>3</b>	<b>Reduce the burden on your support call center.</b> ASTREX Cloud Certification provides Merchants and VARs with a complete workflow, library of test cases, and tools needed to guide self-managed EMV certification projects with real-time automated results.
<b>4</b>	<b>Improved Merchant Experience. Faster onboarding.</b> ASTREX Cloud Certification delivers a competitive advantage to Acquirers by onboarding merchants through a more streamlined and intuitive process. Your Merchants and VARs can migrate to and comply with EMV at a much lower cost whilst benefitting from an improved service experience with your organization

# ASTREX Cloud Certification: Transforming EMV Certification & Compliance

**ASTREX Cloud Certification** gives merchants access to the tools, test cases, and automated workflow and real-time host simulator needed for an intuitive, self-managed certification process. With cloud access, merchants and VARs no longer depend on scheduling access to your production host. Results can be submitted at any time, with responses in real-time.

## Features of ASTREX Cloud Certification

### Merchant Project Setup

- Merchant Registration
- Project Setup
- Checkpoint Suites and Test Cases
- Project File Creation

### Test Management

- Terminal Analysis
- Card to Terminal Project File enrichment
- Test Project management
- Online Project File Submission

ASTREX Cloud Certification is typically deployed with our SCIMatix Terminal Analysis product but can also support third party products

### Validation & Certification

- Acquirer Host Emulation
- Scheme Network Emulation
- Test Host Database Analysis
- Terminal to Host Project File Enrichment

### Project Support

- Project Workflow
- User management
- Reporting
- Document Repository

## About Acquirer Systems

Acquirer Systems is a leading provider of testing solutions for payment cards, devices and networks.

With extensive international experience, we support some of the world's largest issuers, acquirers and vendors as well as many national and international payment networks.
